They say the job is what you put into it. And we agree. That’s why we work with the craftsman to develop innovative products with an unwavering focus on consistency and durability. Our products are engineered to perform and are backed by results.

As we renew our brand, we renew our commitment to put the best products in your hands. Our mission is to empower you to build better.

“My company has been in business since 1923. We have an excellent reputation to uphold and I only use products that are going to help my team provide the highest quality service to our customers. Whether we are working on a cutting-edge building at a major university, or a neighborhood supermarket, we want to be known for delivering on our promise. Amerimix helps us do just that.”

PREBLENDDED PRODUCTS
The Choice is CLEAR

Consistency
Amerimix products are factory blended to exact specifications in a controlled manufacturing environment, using high quality raw materials. This is done with every batch to maximize the performance of every bag of Amerimix Stuccos, Mortars, and Grouts.

Labor Reduction
Jobs move faster and with less labor because Amerimix factory blended products eliminate shoveling large amounts of sand into mixes.

Enhanced Productivity
Amerimix products are precision blended resulting in better performance with fewer callbacks.

ASTM Rated
Amerimix products meet or exceed ASTM specifications. Because our products are factory blended to exact requirements – you can be confident that the finished product will meet all of your job needs.

Reduced Waste & Risk
Amerimix 80 lb factory blended bags and 3000 lb bulk bag & silo systems significantly reduce storm water runoff from jobsite sand piles reducing the risks of costly penalties associated with EPA storm water rules.
