

LEED

CREDIT CATEGORIES		POSSIBLE CREDITS
Materials & Resources		
Credit 4	Recycle Content, greater than 20% (post-consumer + 1/2 pre-consumer)	2 Credits
Credit 5	Regional Materials, greater than 20% Extracted & Manufactured Regionally	2 Credits
Project Totals		
Certified Level 40-49 Credits • Silver Level 50-59 Credits • Gold Level 60-79 Credits • Platinum >80 Credits		

Amerimix's products assist owners, designers and construction professionals in earning LEED points for any commercial projects. The table above identifies the specific points that may be achieved by using Amerimix products.

Established by the U.S. Green Building Council in 1998, Leadership in Energy and Environmental Design (LEED) green building rating system is a voluntary and consensus-based rating system. LEED is founded on accepted energy and environmental principles, striking a balance between established practices and emerging concepts. It evaluates environmental performance from a whole-building perspective, providing a definitive standard for what constitutes a "green building".

The rating system promotes sustainability and energy efficiency by recognizing performance in 6 key areas.

- Sustainable Sites
- Energy and Atmosphere
- Indoor Environmental Quality
- Regional Priority
- Water Efficiency
- Materials and Resources
- Innovation in Design

AMERIMIX bulk bags and pallets are **100% recyclable**.
