

RAINBLOC GP[®]: THE SOLUTION FOR TOTAL MOISTURE CONTROL IN MASONRY

THE RAINBLOC SYSTEM PROVIDES COMPLETE CONFIDENCE.

Blending patented RainBloc GP integral water repellent into both masonry and mortar products delivers lifetime protection against moisture intrusion – the secret behind eliminating mold, rot and efflorescence.

RainBloc technology delivers superior performance vs. field-batched or post-applied IWR systems with zero impact on aesthetics, installation speed or material strength – and is available exclusively from Oldcastle APG.

AMERIMIX WRM WITH RAINBLOC GP

AMX 410 WRM / AMX 510 WRM

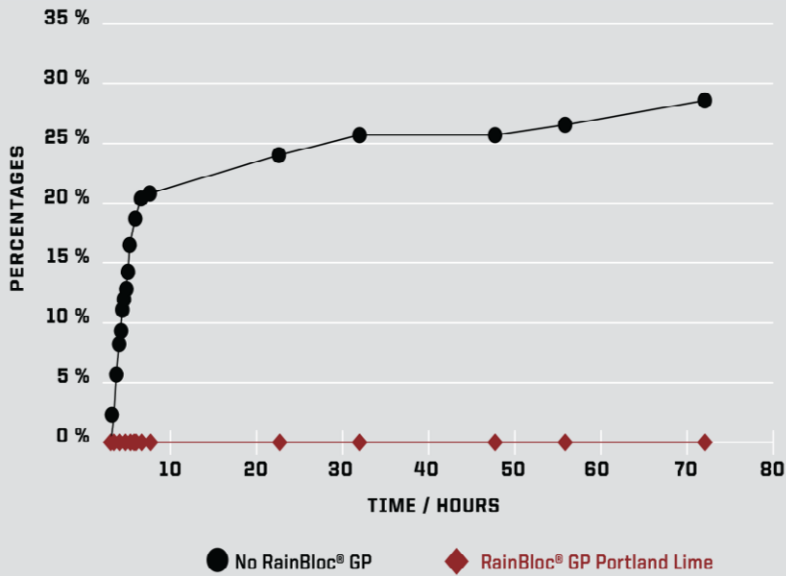

ECHELON MASONRY WITH RAINBLOC GP

Available in all structural and veneer units.

TESTING PROVES THE EFFICACY OF RAINBLOC GP

When tested in accordance with ASTM E1105, walls built with RainBloc GP demonstrate zero moisture penetration after 72 hours of continuous moisture exposure.

DAMPNESS ON BACK FACE SET AVERAGE

*Laboratory tested by the Concrete Masonry & Hardscapes Association using E514 testing methodology.

Wall System **without**
RainBloc Technology

Wall System **with** Amerimix WRM and
CMU's containing RainBloc Technology

TECHNICAL INFORMATION

Meets or exceeds the following:

- ASTM C1384 Water Repellency Standards
- Rated "E" for Excellent when used in conjunction with RainBloc-treated masonry units, per ASTM test E514
- ASTM C270 Standard Specification for Mortar for Unit Masonry
- Available in masonry cement (AMX 500 series) or Portland-lime cement (AMX 400 series) formulations
- Available in Types N, S and M

UPGRADE TO RAINBLOC GP PLUS

Elevate the performance of your mortar by upgrading to RainBloc GP Plus with Tracer Technology.

This patented technology is the only additive on the market that allows for quantitative analysis of the hardened mortar for ultimate peace of mind.
